OMR-based Exams and Evaluation: Optical Mark Recognition (OMR) based examination and evaluation software is used for objective (MCQ) type tests. We provide various templates for the answer sheet printing. This software generates its own Bar code for identifying the answer sheets. We can also simply do OMR scanning for pre-printed OMR sheets and even design them for you!

SCAN – CALCULATE – GET RESULT ANALYSIS

Through our software you can print your OMR Answer sheets on normal A4 or Legal paper.

A

Create the Courses-Class-Category offered by you in your Institute for training and conducting exams and register students who have taken admission

B

Create Templates giving number of Questions; Answers per questions; Shape if round/square OR use your pre-printed OMR sheets

C

Create the Exam Schedule and Print Answer Sheets with Bar Codes (skip if using pre-printed), enter Solution Key and scan to get immediate and 100% accurate results with full analysis

D

You can also generate question papers daily with auto solutions if you also have our Question Bank software and have created questions of various types as per study material.

Only 4 steps to a speedy and 100% accurate OMR-based exam
