Solution

Automation

• Generation of Tokens, Case Numbers, Insurance Details & Approvals, Doctor appointments, Allotment of consultants, Investigation inputs & alerts to Labs, payments for services, follow up visit dates, etc., are in-built features of our automation solution

• In Hospital business, element of human force gains special importance. Keeping this vitality into the consideration we have designed an employee centric HR Management (Attendance, Leaves & Pay roll). HR Management module covers day to day activities and tasks pertaining to existing employees, new hires and also contractual employees. Employee schedule supports tracking the duty timings, man hours over various activities and much more.

• MIS – Reports, Dashboards and Query Analyzers. Information to management is available immediately of - daily receipts; claims pending; count of patients, lab-wise tests conduction, honorarium and commissions due to doctors, and any other information required. Immediate and simple access to the requisite information by the automation of the complex tasks & worflow within the hospital or clinic is the key focus of eH2A, enabling freeing the staff to spend more time on caring for patients and extending the reach of services. Our experience and expertise in implementation coupled with extremely easy user interface with strong access rights & security features will help to easily deploy all modules giving you quick results and immediate visible benefits.

• Our software directly addresses all of a hospital's global inventory management and point-of-use challenges. It enables hospitals and clinics to become significantly more efficient at point-of-use locations. Multiple accounting units with conversions to base unit for all item types including drugs, injections, syrups, etc. can be customized. Dynamic search is available not only for drugs but also the chemical names displaying current stock quantities.

• Mobile Apps, Bar Codes, Biometric Devices, Rf-Ids, can be used wherever required. The system can be integrated with Automatic SMS and eMail Facility
