

Question Bank

Online Exams

Results & Analysis

Ekk-Pareeksha : Ekklavya's Computer Based Examination software, which helps conduct all sorts of exams - Entrance, Competitive, Semester, Regular etc. online. The exam can be conducted on Internet / Intranet. The software creates random questions during the real-time of the exam. Results are generated as soon as the exam is over & past history available with analysis.

The biggest advantage is the prevention of "Paper / Question Leaking"
Results are given instantaneously including an analysis of the performance.

■ Our solution provides a two-fold approach. On the one hand, teachers are given a software to create a 'bank' of questions that are analytical, numerical and enhance the creative thinking skills.

The Question Bank module mainly deals with the collection, arrangement and administration of large number of questions of different levels of toughness from scientific as well as non-scientific subjects related to various classes. This software can generate test papers automatically with ease as per the criteria set by the user.

Ekk - Pareeksha

Ekklavya's Computer-Based Online Exams

■ On the other hand, software is implemented for conducting computer-based exams for all students who will get random questions as per pre-set difficulty levels from subjects they have registered for.

Making assignment sheets, daily practice tests, weekly tests, Test series, Online Tests, etc. is a repetitive and time consuming process which involves both teacher and the computer operator. Using this Question Bank Software the same process can be accomplished in minutes even in absence of operators.

Thus, Ekklavya's Computer-Based Online Exams provide a unique, and most meaningful, transparent, flexible and distributed learning environment helping students to analyse and improve in all dimensions.
